Let's Create Digital

Letter of Recommendation

To Whom It May Concern,

I am pleased to write this letter of recommendation for **Ashmeet Singh Sandhu**, a B.Tech student in Computer Science and Engineering at the **Indian Institute of Information Technology (IIIT) Una**, with a current CGPA of **8.80/10**. I am currently mentoring Ashmeet as a research intern at Simhatel **Tech. Pvt. Ltd**, where he has been working under my supervision since **20 December 2025**.

During his ongoing internship, Ashmeet is working on **ECG modeling and multimodal biomedical time-series analysis**, focusing on integrating ideas from language models and vision-inspired architectures for efficient and scalable biomedical signal understanding. He actively contributes to exploring model architectures, designing experiments, and analyzing performance–efficiency trade-offs with an emphasis on real-world and clinical applicability.

Ashmeet is involved in tasks such as data preprocessing, experimental design, model implementation, and evaluation on ECG datasets. He demonstrates a strong ability to translate research concepts into **structured, practical software pipelines**, supported by a solid foundation in Python, machine learning frameworks, and system-level thinking.

Beyond his technical abilities, Ashmeet is highly self-motivated, receptive to feedback, and consistent in his work ethic. He communicates ideas clearly, asks thoughtful questions, and approaches research challenges with maturity and curiosity, demonstrating strong problem-solving skills.

Based on my experience working with him so far, I confidently recommend **Ashmeet Singh Sandhu** for **research internships, industrial internships, and advanced academic programs**. I am certain that he will continue to be a valuable contributor and grow further as a researcher and engineer.

Please feel free to contact me if any additional information is required.

Sincerely,

Dr. Durgesh Ameta
